BURR ASSISTANT TO CO. SCHOOL SUPT.

WILL AID IN SUPERVISION OF VITALIZED AGRICULTURE WORK

TAKE METHODS TO S. D.

Two Nodaway Instructors will be in Charge of Teachers Course Given at State Agricultural College

Realizing the importance of the vitalized agriculture work in the rural school of Nodaway county, and that it is now up to Nodaway county to hold the leadership and prestige she has held in past years in this work, the Chamber of Commerce, at a meeting of the board of directors last night employed W. H. Burr, superintendent of the school at Pickering, as assistant to County Superintendent Bert Cooper and supervisor of the vitalized agriculture work in the county.

Mr. Burr is one of the original five teachers of Nodaway to take this instruction and teach it in the rural schools. At present there are 37 rural schools in Nodaway county, teaching vitalized agriculture. It is expected there will be double this number next year, and the work has enlarged so rapidly that the aid of a county assistant is imperative.

Dr. W. E. Johnson, president of the State agricultural college at Brookings, S. D. was in Maryville yesterday visiting the rural schools where vitalized ture is taught. He was also a guest of the Chamber of Commerce at the regular meeting last night.

Dr. Johnson spoke last night and complimented the work done here very highly. Dr. Johnson, as well as other well known educators from all parts of the country have been attracted to Nodaway county by the great success of their methods of applied vitalized agriculture in the rural schools. He is desirous of establishing a similar course of instruction on the South Dakota school and for that purpose he has employed Mr. Burr and Miss Maude Whitehead now teacher in the rural school at Gaynor, to teach in the South Dakota college during the summer term and train teachers there in this work. Miss Whitehead, as well as Mr. Burr, is one of the original five teachers of Nodaway county to take up the work. The course at the Dakota college will open June 1, and will be a six weeks intensive training for teachers in charge of Mr. Burr and Miss Whitehead. Mr. Burr has already received two highly remunerative offers from Utah educators who have recently visited Maryville.

The group of teachers to take the training at the State Teachers college short course this summer, is practically signed up now and the list filed with Superintendent Cooper. The number is necessarily limited and will include between 65 and 70 teachers. It opens July 2, and specialists in rural education from various parts of the United States and educators of national renown will attend. Dr. A. E. Winship of Boston and Miss Charlotte Williams of Nashville, Tenn., will be among those attending.

Allison Secor of Des Moines, Ia., editor of "Successful Farming" will be in Maryville Friday to visit the rural schools and gather material regarding the vitalized agriculture instruction and some of the model farms of Nodaway to be used as news features in his publication.

Sowing Seeds

It will soon be seed sowing time, and if you sow wisely you will probably reap a good reward—

But the harvest does not depend entirely on the sowing—it depends on the care and cultivation given the crop and also on the soil and climatic conditions.

It's the same way with money——

You can earn the seed, but you must sow it wisely, care for it and give it the advantage of the best investment so that it will not be wasted and will grow gradually into a fortune.

Plant your seeds in a substantial savings bank and watch them grow.

Maytag

Wood-Tub Electric Washer

NO OTHER MACHINE IS SO WELL EQUIPPED to give you so many years of faithful service as famous Maytag Wood-Tub Electric Washer.

Every detail in the design and construction of this pioneer electric washer is done to give it the highest type of washing machine excellence.

For instance, the legs are formed by extended tub staves which are strongly braced. This insures a stability impossible in any other form of leg construction.

Then, too all moving mechanism is inclosed. This is an added protection to both the mechanism and the operation.

THE MOTOR, a standard General Electric one, is installed underneath the tub—fully protected from water. In fact, most of the mechanism is underneath the tub. In addition to this protection, an unusual stability is thus given to the Maytag.

This washer has many exclusive advantages, among which is the Maytag swinging, reversible wringer with quick-release, safety attachment.

Therefore, when you decide to dispose of wash-day work the clean, quick, economical way, be sure to investigate thoroughly the Maytag Wood-Tub Electric. Come in for a demonstration; then you will at once recognize the reason the Maytag has won such a widespread reputation for dependability. We will be glad to show you any time.

What 5,000 Miles mean to you

Overland, on frozen, rough Indiana roads, did 5,452 miles in seven days.

Equal to New York to San Francisco and back to Chicago at express train speed—with no change of engines—no let-up to the terrific wear and tear. It means more than a year's abuse and not a flaw; stamina, quality in every part; another demonstration of the wonderful riding qualities of the radical new Triplex Springs.

Average, 32.45 miles per hour.
Gasoline, 20.24 miles per gallon.
